Dear Parent or Guardian,

The Healthy Schools Act of 2000 requires all California school districts to notify parents and guardians of pesticides they expect to apply during the year. Our goal, and the goal of our Pest Management Company, “Clark Pest Control”, is to utilize materials that are considered exempt by EPA as a pesticide. However, should a situation arise that these exempted materials are not enough to control a specific infestation the following pesticides may be used in your school this year.
